

Opioid Solution Grants: Q&A Continuation

Q: Given the Project Lazarus model to be used, would the funding consider a project that supported family member intervention (such as a group for those impacted by a family members use) of those not using?

A: Yes. An initiative to support a group of people impacted by overdose even if they were not directly using themselves, would be considered for funding.

Q. Can you give stipends to people to attend meetings?

A. Yes, Stipends are allowed in the response to the RFP. For the purpose of clarity, stipends are defined as an incentive (typically in the form of a gift card), if needed, for program activities. The total amount of incentives cannot exceed \$30 during the lifetime of the intervention, and must be included in your budget along with a description as to why they are needed (e.g., retention of youth, recruit parents to event), and how they will be utilized in the budget narrative.

Q. Can you include bus transportation for the children of abusers to pay for a bus from Ricci Middle School to their home one day per week so that the child can stay after school for our opioid programs?

A. No. Transportation is an excluded item in the response to the RFP. However, is allowable in the Recovery Support Activities mini-grant.
